Flash Toolset offers a comprehensive set of features. It includes the ability to add, rename, delete and modify a movie embedded in Flash SWF files and their nested folders. The SWF file can be copied and moved to an external folder without losing its content. The software contains a series of tools that permit extracting the data (images, sounds, shapes or video) embedded in the Flash media files. It also features an efficient code analyzer for previewing code errors and merging the syntax of ActionScript and ActionScript 3.0 scripts. All the tools are set in a compact and easy-to-use interface that permits file edition without the need to leave the program. You can preview the SWF files and run them through the "AutoRun" feature, which allows you to change the launch condition and set the action that should happen when the movie is accessed. The feature enables you to play the movie and to pause it when desired. Flash Toolset includes the following tools: Flash Extractor - allows extraction of embedded audio and video files from SWF or FLV files. Flash Gallery - an album maker, it allows you to generate albums with pictures or to insert movie clips into the album. Flash Transparency Maker - helps you to change the image's color and transparency. Flash ripper - a program that allows you to extract Flash movies from SWF, ZIP or RAR archives. Flash Uploader - a program to upload and manage Flash content. Flash Annotator - includes the ability to add text, shapes and embedded images to the movie. Flash Editor - is an editor to write ActionScript and AS3 scripts. It also features the possibility to write, format and test the formatting of the code with various syntax coloring options. Flash Player

Simulator - a bandwidth analyser that simulates the download speed of the SWF file. Among the customization options of the file, you can determine the dimensions, speed of the file, whether it should play in loop, scaling and alignment. Flash Toolset 7.4.2.2 Activation Key Features: - Play SWF files (support for FLV and RAR archives) - Extract embedded audio and video files from SWF or FLV files - Change a picture's color and transparency using Flash Transparency Maker - Create albums with pictures and Flash Movie clips - Annotate Flash files - Play SWF files with Flash Player - Set ActionScript code for the movie aa67ecbc25

Creating a website is an art that requires a talented creator. It is very time consuming, but also very rewarding. To create a good Flash website, you need many different tools, where it is important to have the right color scheme, a good structure, and good effects, but above all creativity. Flash Toolset is a collection of tools that help you get a professional website done in no time, creating a good design and fulfilling all the needs you will have. The main concept behind Flash Toolset is the simplicity of use. You can easily access all the tools you need by using the intuitive interface, and by simply clicking on the "Play" button, your Flash website will be created with ease. The software is compatible with all Flash websites, like webpages, homepages, portfolio of pictures, about us pages, contact us pages and so on. Flash Tools 2.6.3 9.90 Free Flash Toolset is a collection of utilities for managing and designing Flash media files. It features a user-friendly interface that permits easy access of the available tools. The application includes the necessary resources for extracting the elements (images, sounds, shapes, or video) embedded in SWF files or creating albums of Flash movies. The functionality of the suite is extensive and offers the possibility to create auto-run files for CDs or compress the Flash content for quicker download and thus faster loading of the page that hosts the data. Other capabilities include annotation options for each frame for the file. The resources at hand include adding text, drawing shapes, a marker and even inserting an image. Web publishing is on the list of features, too, with automatic code generation after all the settings have been made. Besides these, Flash Toolset brings to the table two separate tools, and ActionScript editor called ASEditor; it offers code hinting, completion support, custom syntax coloring and file export/testing. Other customization choices include altering the dimensions of the file, enabling playing in loop and scaling. Also included in the package is a bandwidth simulator that permits testing the download speed of the file depending on a selected connection type.
