Clinical characteristics and surgical outcomes in elderly patients with patellofemoral osteoarthritis. This study compared clinical characteristics and surgical outcomes between younger and older patients who underwent total knee arthroplasty (TKA) for patellofemoral osteoarthritis. Charts were reviewed for 67 consecutive patients (51 women, 56 hips) who underwent primary TKA for patellofemoral osteoarthritis. The mean patient age was 71.1 years (range, 57-86 years). Patients were classified into younger (≥ 70 years, $n = 37$) groups. We compared patient-reported outcomes, surgical outcomes, and complications between the two groups using the Chi-square test and Student's t-test. In the younger group, 37 knees (63%) were affected by primary patellar maltracking, and in the older group, 22 knees (59%) were affected by previous patellar instability. Preoperatively, patients in the younger group had significantly better outcomes than those in the older group in the Western Ontario and McMaster Universities Osteoarthritis Index ($p = 0.01$), as well as in the UCLA ($p = 0.03$) and Oxford ($p = 0.01$) knee score. Both groups had equivalent Jams-Predicted Mayo Elbow score, with no difference in pain relief ($p = 0.59$), flexion recovery ($p = 0.71$), or return to sports ($p = 0.25$). Complications occurred in eight of 30 (27%) younger patients and in 10 of 37 (27%) older patients ($p = 0.82$). In both groups, complications were uncommon and primarily related to wound healing and/or deep vein thrombosis. Based on self-reported symptoms, patellofemoral osteoarthritis patients showed clinical characteristics of patellofemoral osteoarthritis that were more severe in the elderly than in the younger patient population. However, TKA was effective and safe in both groups. Characterization and

At the same time, the Foggy Dawn rises in a remote village to ruin the lives of the people. An odd woman named Clara has also appeared, and remains in this village.

Though the people cannot see the Elden Ring, the existence of the Ring is confirmed by the voice of the souls of the dead and the ones who have been abandoned. Clara also divulges that the Ring will come into being due to the actions and existence of the godlike goblins called the "sun gods."* This is the reason this village is covered with shadows.

There is also a strange village on the other side of the Elden Realm that has no divine beings. The village continues to operate as if nothing has happened.

Clara is given immense powers from the godlike sun gods. She leads a group of rebels who the nation calls the "Rebel Army." Their first target is to cross the Foggy Dawn and reach the Elden Realm to

When you visit a place, you often like to look at its map in order to know its physical environment more clearly. The measurement of maps can give different ideas to different audiences. Currently, most of the desktop maps are drawn with the measurements of a typical map plane. If you want to have maps with variable measurements, here is a new variety for you.

A vintage map is specially designed to let its viewers enjoy the map and its details. The dimensions of the map plane, such as 1 inch = 5 miles, refers to the original map plane. The map resolution is of 4K, which looks really awesome.

"It can be carried, it has a value; if not, it is useless" The user could clearly see the elevation of the land, as well as the town, in this map. On the other hand, the water areas were drawn with uniform depth. The user can have a better look at the landscape and the geography in this map. This map indeed makes you change your thinking and consider what is valuable and what is useless. Unfortunately, this map is private property, and the user couldn't take it home since it is too big. It's just a piece of antique.
